REGISTRATION

Advance registration is encouraged to avoid lines at the door and to receive the early bird discount. Please fill out the registration form and send it to the address listed. Advance registration must be postmarked by September 9, 2010.

HOTEL ACCOMODATIONS

The Ramada Inn, located just off I-70 and Vine (3603 Vine Street), has reserved a block of rooms for those attending the seminar at a discounted rate of \$62.00 per night. Deadline for this discounted rate is September 9, 2010. After this date, the rooms will be released. Make reservations directly with the Ramada Inn by calling: 785-625-7371.

CANCELLATION POLICY

A full refund will be granted to those requesting a refund prior to September 9, 2010. A cancellation received after September 9, 2010 will be subject to a \$30.00 processing fee.

LECTURE/LECTURE ROOMS

Content of seminar may change without notice. Environmental temperatures may vary. For your comfort, a sweater or jacket may be appropriate. As a courtesy to fellow participants, beepers or pagers should be put in silent mode or turned off during presentations. Children should not be brought to the seminar.

KRCS APPROVED CEUs

The Hays Medical Center Respiratory Care Continuing Education Evaluator on behalf of the Kansas State Board of Healing Arts has approved this program for 12 hours of continuing education (8.0 hours on day one and 4.0 hours on day 2): Providership #36. Hays Medical Center is approved as a provider of continuing nursing education by the Kansas State Board of Nursing. This course offering is approved for 12.0 contact hours (8.0 hours on day one and 4.0 hours on day 2) applicable for RN or LPN rec licensure. Kansas State Board of Nursing Approved Provider Number: LT0021-1138. All participants are required to sign in each morning and afternoon and can pick up their certificates of attendance at the conclusion of the seminar. Prorated education hours may be obtained each day for those participants leaving prior to the end of the seminar. No money will be refunded to participants who leave early.

PROGRAM OBJECTIVES

At the end of the presentations, the participants will:

1. Define and describe ETCO₂ and the relationship between exhaled and arterial CO₂. Review clinical applications of ETCO₂ and identify waveforms.
2. Identify the characteristics of home care clinical pathways for respiratory care
3. Understand spirometry terminology, review ATS Standards and review Quality Control.
4. Discuss recommendations from the RT 2015 Conference, be aware of current patient/professional advocacy activities, and be informed of current KRCS activities and areas of involvement.
5. Develop an understanding of how to adjust ventilator settings based on ABG results, select specific patient types who receive benefit using BiLevel/APRV, and maximize MAP through the utilization of BiLevel/APRV.
6. Compare and contrast research techniques of aerosol delivery, describe indications for Circulaire II nebulization method, and define terminology related to aerosol delivery.
7. Discuss the AARC Clinical Practice Guidelines relative to the management of the difficult airway, describe the clinical signs of an obstructed airway, discuss morbidity & mortality of reintubation, and explore adjuncts now available to assist in management of the airway
8. Understand key indicators of well being and implement strategies to improve a healthy lifestyle including behaviors, attitudes and social interactions; identify behaviors that can maximize workplace job performance; and understand the differences between leadership and management.
9. Identify patients that would be appropriate candidates for EBUS-TBNA, the necessary equipment and steps used in an EBUS-TBNA procedure, and post-operative complications associated with EBUS-TBNA.
10. Gain a basic knowledge of the new Meaningful Use standards as they relate to respiratory care charting. Understand the difference between an electronic medical record and an electronic health record. Become aware of the changing dynamics in charting using quantifiable data elements.
11. Understand hospital participation in Health and Human Services Grants. Discuss the importance of respiratory therapists in hospital pandemic planning and in "All Hazards Planning".
12. Review the history of infant resuscitation and the beginnings of surfactant research. Understand the importance of surface tension in relationship to surfactant and discuss current surfactant research and future trends.
